## SUPPLEMENTAL OFFICE ACTION

1. This office action is supplemental to the office action dated August 18, 2003 and in response to the Declaration under 37 CFR 1.132 filed August 8, 2003 before the mailing of the office action dated paper # 15.

The Examiner's position with respect to the office action dated August 18, 2003 remains unchanged, and the Declaration under 37 CFR 1.132 filed on August 8, 2003 fails to overcome the rejection set forth therein. The Declaration states that "A comparison was made between the instantly claimed invention containing phthalazine and phthalic acid and the succinimide and phthalimide as disclosed in the working example 1 in moon '796". It is unclear as to which the material used in the comparison, i.e. the material presented in the specification disclosure and the material taught in Moon in example 1 or otherwise. Moreover, the Declaration reflects the applicants'evaluation or opinion of the material rather that presenting the direct numerical comparison between the material that the applicants considered as their invention and that of the applied prior art Kirk in column 12, lines 6-8 disclosed the preferred toners such as phthalazinone, phthalazine and phthalic acid either alone or in combination with other compounds. The worker of ordinary skill in the art would have selected to known preferred toners such as taught in Kirk such as phthalazine and phthalic acid as toner for the photothermographic material, and the selection thereof would have been prima facie obvious to the worker of ordinary skill in the art.
